Smoke Detector Test Spray

silicone-free
evaporates without leaving residues

Smoke Detector Test Spray can quickly and reliably test the functional capacity of optical and photoelectrical smoke detectors without additional testing instruments.

The use of WEICON Smoke Detector Test Spray does not contaminate the detectors because the spray evaporates without leaving residues.

WEICON Smoke Detector Test Spray can be used in all applications involving photoelectrical fire detectors – for example, in industrial plants, public facilities or private residences.

Technical data

Colour	colourless
Odour	solvents (slightly)
Shelf life (minimum)	24 months
Special features	silicone-free, evaporates without residues

Processing

Shake can before use and spray WEICON Smoke Detector Test Spray for about 5 seconds and with a distance of approx. 30 cm towards the smoke detector.

If there is no reaction, testing should be repeated. If there is still no reaction after several tests, the smoke detector is defective and must be replaced.

Storage

Pressurized container: protect from sunlight and do not expose to temperatures exceeding +50 °C.

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation.

We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended.

A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.

Health and Safety

When using WEICON products, the physical, safety technical, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.
